

Handcrafted Oak Frame Kits Pergola & Pergoda Collection

Introducing...

Our Handcrafted Oak Frame Kits

At JMK Oak frame, we take immense pride in creating exquisite oak frame kits that harmoniously blend traditional craftsmanship with modern engineering techniques.

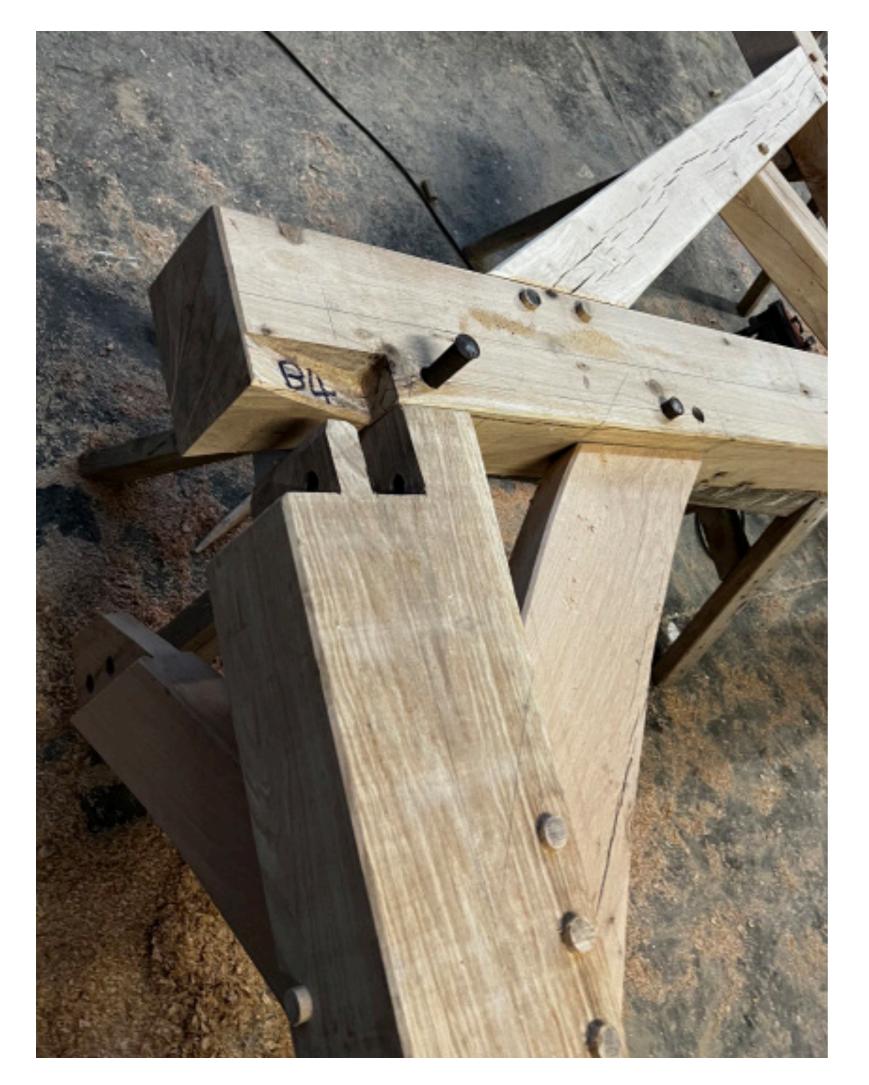

What sets our oak frame kits apart?

We go beyond conventional methods, ensuring unmatched durability and structural integrity through our innovative joinery techniques. While many rely solely on mortise and tenon joints, we elevate the process by incorporating interlocking jowl posts secured with dovetail joints on the tie beam.

Every joint in our frames is further reinforced with handcrafted oak peg dowels, meticulously inserted into pre-drilled holes. These pegs add an extra layer of strength, preventing movement within the joints. This interlocking mechanism, combined with the natural resilience of oak, results in a rock-solid frame built to stand the test of time for generations.

Experience timeless charm and superior quality. Discover the enduring appeal of our handcrafted oak frame kits. Get in touch with us today to discuss your project and explore our range of options.

About Our Oak Kits

Looking to construct your own oak structure? Our kits are the perfect solution. Each joint is carefully numbered to ensure easy assembly, and if you'd prefer, we also offer a full installation service for a hassle-free experience.

Our oak kits are designed to provide flexibility. They are supplied without rafters or roofing, allowing you to customize the final look and feel of your structure to suit your preferences.

Custom Options

Staddle Stones: Available as an optional addition to your kit, quoted separately based on the dimensions of your structure. Dimensions: Simply provide the required measurements (e.g.3m x 3m), and we'll craft your kit to the specified sizes.

Pricing

Please note, prices listed in this brochure are exclusive of VAT.

Delivery & Collection

You can choose to collect your oak kit directly from our workshop. Alternatively, we can deliver to your site, with transport costs quoted on a case-by-case basis, reflecting the bespoke nature of each kit.
